Heritage-Farm

Unified AI Tourism Platform for Tamil Nadu

3 Sectors, 50K Creators, 286M Tourists – One Marketplace

Agri & Rural

Heritage & Culture

Eco & Adventure

Tamil Nadu's Tourism Problem: Beautiful but Broken

Agri & Rural Tourism Crisis

90% of farming families remain invisible to tourists with no channels to monetise farm tours, homestays or authentic food experiences. Seasonal income collapse leaves families struggling for six months.

"Farmers want to earn from tourism but don't know how to reach tourists"

Heritage & Culture Disconnect

Over 1,500 temples and heritage sites scatter across Tamil Nadu. Whilst TTDC offers VR tours, tourists cannot find the craftspeople preserving traditions or support artisan livelihoods directly.

"Tourists see temples in VR but never meet the priest who maintains it"

Eco & Adventure Underserved

Popular eco-destinations face overcrowding whilst hidden trekking trails and coastal gems remain undiscovered. No centralised platform connects eco-stays, adventure guides or sustainable tourism operators.

Stunning eco-destinations go empty in off-season whilst hill stations choke"

All three sectors desperately need AI-powered demand distribution, digital onboarding for rural communities, transparent revenue sharing, and integrated storytelling to thrive.

The Convergence Opportunity

Tourism Sectors ARE One Ecosystem

We discovered something profound: tourism sectors don't exist in isolation. A single tourist journey naturally flows across all three – from organic farm experiences to ancient temple visits to mountain treks through the same village lands.

Farm Experience

Tourist learns organic rice farming during farm-stay

Heritage Discovery

Visits temple built by farming-era kings, appreciates agricultural roots

Eco Adventure

Books eco-trek through same village lands, complete integration

“There is no 'agri tourism' tourist or 'heritage tourism' tourist – there's just tourists who want authentic Tamil Nadu. We connect them to all three sectors at once.”

Heritage-Farm: One Platform, Three Sectors

Agri & Rural Tourism

- Plantation tours & farm-stays
- Organic food tasting experiences
- Seasonal harvest participation
- Rural homestays & workshops

Heritage & Culture Tourism

- AR-guided temple walkthroughs
- Artisan craft experiences
- Immersive cultural storytelling
- Direct craft commerce

Eco & Adventure Tourism

- Guided trekking expeditions
- Eco-lodges & wildlife tours
- Coastal exploration activities
- Seasonal conservation events

Our AI integration acts as the brain – matching tourists to optimal combinations across all three sectors, predicting demand patterns, enabling dynamic pricing, and bundling complementary experiences into seamless journey arcs.

Seven Game-Changing Innovations

Sector Cross-Pollination

AI automatically bundles farm experiences with heritage visits and eco-adventures, increasing tourist spend by 40% whilst distributing revenue across all creator types.

Universal AR Layer

Single AR engine serves all three sectors – temple reconstructions, crop history timelines, and real-time plant identification during treks.

Voice Commerce in Tamil

Farmers, artisans, and guides list experiences via WhatsApp voice messages in Tamil – eliminating digital literacy barriers completely.

Seasonal Intelligence Engine

Platform routes tourists to optimal seasonal experiences – monsoon bird watching instead of crowded hill stations – achieving 50% improvement in off-season utilisation.

Reverse Auction Bundles

Tourists post desired experiences and budgets; creators from all sectors bid competitively, driving down prices whilst maintaining quality standards.

Conservation Revenue Pool

1-3% from each sector funds organic farming research, artisan preservation programmes, and wildlife conservation – generating £30L annually by Year 3.

Integrated Journey Examples

Five real journey arcs demonstrating how Heritage-Farm seamlessly combines all three sectors into unforgettable experiences:

Tourists spend 40% more when experiences bundle across sectors. Creators earn significantly higher revenues. Overcrowding problems solved through intelligent distribution.

Revenue Model: Five Streams, Three Sectors

Year 1 Revenue: ₹50L

- Agri sector: ₹20L (40%)
- Heritage sector: ₹18L (36%)
- Eco sector: ₹12L (24%)

Creators earn 70-75% of every booking, platform retains 20-25% commission.

Year 3 Projection: ₹12Cr

- 8,000 bookings → 150,000 bookings
- 300 creators → 5,000 creators
- ₹2Cr creator earnings → ₹50Cr

Premium memberships and B2B partnerships drive 85% margin revenue streams.

Market Opportunity Across Three Sectors

Our Vision: Tamil Nadu Leads the World

The Future

"In three years, Tamil Nadu becomes the world's first tourism destination where every farmer, artisan, and eco-guide earns from tourism – and every tourist discovers authentic Tamil Nadu all at once."
